

RAHUL KHEDKAR

Technical Program Manager | AI Transformation | Engineering Productivity | Secure Global Operations

rahulkhedkar72@gmail.com | +81-80-7841-7727 | Bangalore/Kochi, India | linkedin.com/in/rahul-khedkar-54b010107

SUMMARY

Technical Program Manager with 8+ years of experience leading engineering productivity, mobile engineering, and AI transformation initiatives. Proven track record of driving organization-wide programs across 20+ engineering teams and 400+ engineers, delivering measurable improvements in software delivery, AI adoption, global operations and managing the vendor contract renewals. Currently leading the design of an autonomous software development framework leveraging multi-agent AI across the SDLC. Achievements include reducing engineering cycle times by 36%, scaling vendor operations across 60+ projects, and establishing AI governance for 250+ engineers. Multilingual leader with extensive cross-cultural experience in Japan and India.

EXPERIENCE

Fast Retailing Co., Ltd.

Nov 2022 – Present · 3 yrs 11 mos

Technical Program Manager

Mar 2024 – Present

Bangalore, India (International Assignment from Tokyo HQ)

- **AI-Driven Autonomous Development:** Designed and is piloting an org-wide Autonomous Software Development Framework — a four-layer agentic architecture (shared knowledge base, domain expert agents, cross-domain orchestrator, workflow agents) spanning requirements analysis, code generation, PR review, test creation, and deployment validation across Frontend and Backend teams. Targeting **30–40% reduction in PR review effort**, **50% reduction in ticket analysis time**, and **30% reduction in bug investigation time**. Serving as Program Lead and KPI Owner with executive steering committee sponsorship.
- Drove a **36%** reduction in engineering lead time, **45%** faster code reviews, and **40%** shorter merge cycles across 280+ engineers through organization-wide productivity initiatives.
- Grew GitHub Copilot adoption from 49% to **95%** and rolled out Claude Code to 230+ engineers, by leading AI enablement across 23 teams, resulting in measurable productivity gains now tracked in monthly CTO-level AI readiness reports.
- Saved **\$130K–\$150K annually** in infrastructure costs, by auditing VDI usage across India, Japan, and the US and proposing a consolidated architecture, while establishing PII-compliant secure rooms at 7 locations.
- Scaled vendor quality improvement from 4 pilot projects to **30+**, by standardizing PR templates, coding guidelines, and sprint scorecards across offshore teams, resulting in 8+ projects graduating to self-sustained quality levels and being offboarded from the program.
- Negotiated vendor contract renewals covering PII clauses, role definitions, and onsite pricing, by coordinating across Legal, Security, Infrastructure, and PMO teams in 3 countries, resulting in tighter compliance terms and clearer SLAs aligned with Tokyo HQ standards.

Application Engineer

Nov 2022 – Feb 2024

Tokyo, Japan

- Delivered CVV validation feature for UNIQLO's global e-commerce app **ahead of schedule**, by owning the full development lifecycle and coordinating with Payment Gateway and BFF teams in Japanese, resulting in on-time release with zero post-launch defects and complete handover documentation.
- Achieved **92% unit test coverage** on Flutter screens, by writing comprehensive tests for Buy Online Pick Up in Store flows, resulting in a measurable reduction in regression bugs during subsequent release cycles.
- Created the vendor quality assessment framework that became an **org-wide program**, by designing evaluation criteria, interviewing 28 project teams, and automating scorecard generation, resulting in the standardized quality improvement initiative later scaled to 30+ projects as TPM.

- Shipped **30+ releases** of Japan’s most-downloaded banking app (12M+ accounts), by owning the full mobile lifecycle — estimation, design, development, testing, deployment — across Android and iOS, resulting in consistent on-time delivery and zero critical launch-blocking incidents.
- Earned **promotion to Tech Lead** within 18 months, by delivering 2 major projects, mentoring 3 junior engineers, and serving as technical interviewer — all vendor coordination and cross-departmental communication conducted entirely in Japanese.
- Enabled remote iOS development for **15+ developers within one week** during COVID, by designing and deploying a Mac mini–based remote build infrastructure, resulting in **1.5M+ JPY saved** in facility costs and zero disruption to release cadence (Silver Award).
- Resolved a critical production defect impacting **50K+ Android users within 24 hours**, by leading root-cause analysis and deploying an emergency patch, resulting in full-service restoration and a company Silver Award for incident response.

SKILLS

PROGRAM MGMT	DORA Metrics, Engineering Analytics (Findy Team+), Vendor Quality Frameworks, SDLC Governance, MBO Planning, Cross-functional Stakeholder Management
AI & TOOLS	Multi-Agent Architecture Design, Autonomous SDLC Frameworks, Claude Code, GitHub Copilot, AI KPI & Adoption Frameworks, DevLLM Gateway, AI Governance & Compliance
SECURITY	PII Compliance, ISO Audits, Secure Room Operations, VDI Architecture
ENGINEERING	Flutter, iOS (Swift/Obj-C), Android (Kotlin/Java), Python, TypeScript, GitHub Actions, SonarQube, Jira, Confluence
LANGUAGES	English (Fluent), Japanese (JLPT N3 — 4 yrs working in Japanese), Hindi (Fluent), Marathi (Native)

EDUCATION

Pune Institute of Computer Technology (PICT), Savitribai Phule Pune University
Bachelor of Engineering, Computer Engineering · 2014–2018 · Distinction

AWARDS & RECOGNITION

- International Assignment (Expat)** — Selected by Fast Retailing HQ to lead engineering transformation at India subsidiary (Jul 2024).
- 2x Rakuten Bank Silver Award** — COVID remote-dev enablement (saved 1.5M+ JPY) and critical production incident resolution (50K+ users).
- Dhirubhai Ambani & Foundation for Excellence Scholarship** holder.
